WORK FROM HOME

Large clean-lined dining tables are standing in for workspace desks more than they ever have before. Paired with a sleek leather office chair and dining chairs in the same finish, the look is streamlined. Accessories like oversize artwork and big potted plants are all the rage this season.

PLANT PARADISE

With so much time being spent at home, it's important to find ways to brighten your space by bringing the outdoors in. The idea this year is simple—place plants (real or artificial!) of various sizes in corners and on windowsills. Use a cozy chair, keep your books handy and you'll love spending time in your botanical reading nook.
