LAYERS OF LINENS

Percalé, cotton sateen, polyester, linen, bamboo...the choice of bedding materials is a matter of taste (see our article “Between the Sheets,” page 58), but the objective is always to maximize comfort. For the sleekest look leading into the cold weather days, we recommend placing a coverlet on top of your cozy duvet.

UPHOLSTERED PLATFORM BEDS

A fabric-covered bed or head-board will bring warmth and cozy vibes to your bedroom. This type of bed frame works as both a plush balance for other standout design elements and, in more minimal spaces, the star of the show itself!

ROUNDED EDGES

Sleek furniture doesn't have to be angular. Current trends demonstrate this well, since designers offer furniture with simple lines with rounded corners. Result: a feeling of fluidity, sensuality and great softness that's perfect for the bedroom.

AREA RUGS

Not only does a rug instantly bring warmth to a bedroom, but it also keeps the look grounded and provides definition. A neutral-hued rug can blend with the space seamlessly. There's nothing like stepping out of bed onto a cozy floor covering before you find your slippers.

SCANDI SERENITY

Natural materials like cotton, linen, hemp, light wood and rattan offer a calming aesthetic. The hallmarks of this style include mixing textures for visual interest and using a palette of white, ecru, beige and greige.

DIVIDING WALLS

Erecting a partition behind your bed is an effective way to divide up an expansive room, and it works especially well in large bedrooms. It can be used as an accent element that boasts different aesthetics on either side, and helps to define the sleeping area from the rest of the room.

PERSONAL ZONES

If your bedroom is large, take advantage of the extra space by adding a daybed or armchair for designated private time away from the noise of the household. Whether it's for reading with a cup of tea, sipping on a cocktail at happy hour or a place for quiet chats with your spouse or kids, it'll always be a special spot for relaxation and contemplation.

CREATIVE CATCH-ALLS

Small decorative pillows and throws can be a headache at bedtime because there’s often no place to put them except on the floor! Baskets are new bedroom mainstays, great for adding style to your space while offering functionality.

PATTERN PLAYS

A fun way to add personal style and a burst of colour to your bedroom is to do it with fun patterned linens in an otherwise spare aesthetic! Here, a bold duvet cover and shams are a focal point of the boho-chic space.

FUNCTIONAL FRAMES

It’s always nice to have something to lean against when you’re sitting up in bed. Yes, a standard headboard is comfortable, but an adjustable frame can be even better! It works especially well if your bed is positioned against or underneath a window, so as much light as possible is allowed in. Just don’t forget to leave room behind your bed to let curtains close smoothly.
