tip
Hang your wreath with a coloured ribbon that matches your colour scheme.

WONDERFUL WINTER STYLE

why WE LOVE IT

There's nothing we love more than a new accessory at this time of year, especially when its design calls to mind a serene scene of a snow-covered forest. Though its look evokes the great outdoors, this natural-themed wreath doesn't have to be placed on an exterior door - it can blend into any room's setting all the way into the new year.

where IT WORKS

The front door, the stairwell, above the mantel or over a buffet are great places to hang this transitional wreath. With its neutral matte finish it looks stunning displayed on a light coloured wall for a subtle soft effect, or at centre stage against a richly hued backdrop. In both casual and formal settings, this wreath holds its own.

who IT'S FOR

If you're a nature lover and like nothing more than being outdoors, this one's for you. With its fine balance of woodsy winter elements and subtle refined aesthetic, this garland will have you wishing for the next snowfall.
